

Surge® *FURY* Series Spin-Fury Plunger

The fastest-falling sand and scale clean-out plunger

**Ribbed
Design**

Great for wells that make solids (sand, salt, scale and paraffin)

Four diameters available

Flow port for accelerated fall times

Fluted design for even wear

Four Diameters Available

- + 1 1/2" Spin-Fury Plunger*
- + 2 1/16" Spin-Fury Plunger*
- + 2 3/8" Spin-Fury Plunger*
- + 2 7/8" Spin-Fury Plunger*

* OFFERED IN DIFFERENT OVERALL LENGTHS

Ideal for:

- + Wells with sand and/or scale problems
- + Wells with Lower BHP
- + Wells that have recently been completed
- + Horizontal applications or deviated wells

Plunger Design

- + Fluted design for even wear
- + Precision placed flow ports for optimal cleanout and accelerated fall times
- + Lower shut in times
- + Groove technology for clean out action

Put a Surge®

in your well.

“Our lift systems drive higher returns by optimizing production, reducing operating cost and minimizing downtime with reliable, custom-designed solutions tailored to the needs of each well.”

Flowco Production Solutions is the premier provider of USA-made Gas Lift and Plunger Lift equipment. Based in Houston, Texas and deploying the best service team in the business, Flowco specializes in the design, installation and optimization of gas lift and plunger lift systems serving oil and gas basins throughout the continental US.

Flowco Production Solutions was founded with a singular goal: to safely maximize the lifespan and efficiency of oil and gas wells with high-performance artificial lift products made in the USA. Founded, owned and directed by pioneers of the artificial lift industry, Flowco is razor focused on well optimization through the use of two advanced artificial lift technologies: Flowco Gas Lift and Surge Plunger Lift. Our lift systems drive higher returns by optimizing production, reducing operating costs and minimizing downtime with reliable, custom-designed solutions tailored to the needs of each well.
