

Flowco Capillary and Spooling Technologies

Built to Optimize™

Maximize production, reduce workovers and help lower operating expense by installing state-of-the-art systems with our **internal** and **external Capillary and Spooling Services**.

Uses

- + Secure installation of TEC line for downhole gauges
- + Precision chemical treatment delivery
- + Produce liquid-loaded gas wells

Benefits

- + Internal or external installations
- + Installs into live wells
- + Protects tubulars
- + Reduces well interventions caused by scale, salt, corrosion, and paraffin
- + Pinpoint chemical delivery at exact depths
- + Adjustable chemical volumes and ability to run custom blends
- + Requires no batch treating or shut-in time
- + Ability to flush and test while running
- + Built by industry leaders

Flowco Production Solutions is the premier manufacturer and service provider of artificial lift and well optimization solutions. Based in Houston, Texas and deploying the best service team in the business, Flowco specializes in engineering, manufacture, installation, and optimization of gas lift and plunger lift systems serving oil and gas basins throughout North America.

Flowco Production Solutions was founded with a singular goal: to optimize the life cycle and efficiency of oil and gas wells with high-performance artificial lift products made in the USA. Our lift systems drive higher returns by optimizing production, reducing operating cost and minimizing downtime with with precision, engineered solutions tailored to the needs of each well.

US Service Centers

Bee Branch, AR	Eufaula, OK	La Vernia, TX
Greeley, CO	Lindsay, OK	Midland, TX
Rifle, CO	Oklahoma City, OK	New Waverly, TX
Lafayette, LA	Woodford, OK	Overton, TX
Watford, ND	Bridgeville, PA	San Angelo, TX
Aztec, NM	Williamsport, PA	Weatherford, TX
Carlsbad, NM	Cleburne, TX	Douglas, WY
Ardmore, OK	Haslet, TX	Rock Springs, WY
	Houston, TX	

Canadian Service Centers

Calgary, AB	Edmonton, AB	Edson, AB
Grande Prairie, AB	Rocky Mountain House, AB
